Director, public and patient
engagement – CATALIS Quebec

The Importance of Clinical Research

The Importance of Clinical Research

Medical Research: The Hidden Face of the Healthcare System

Although it is not well known, this medical research ecosystem is essential. It develops and improves all treatments available to the public, and analyzes their efficacy and safety.

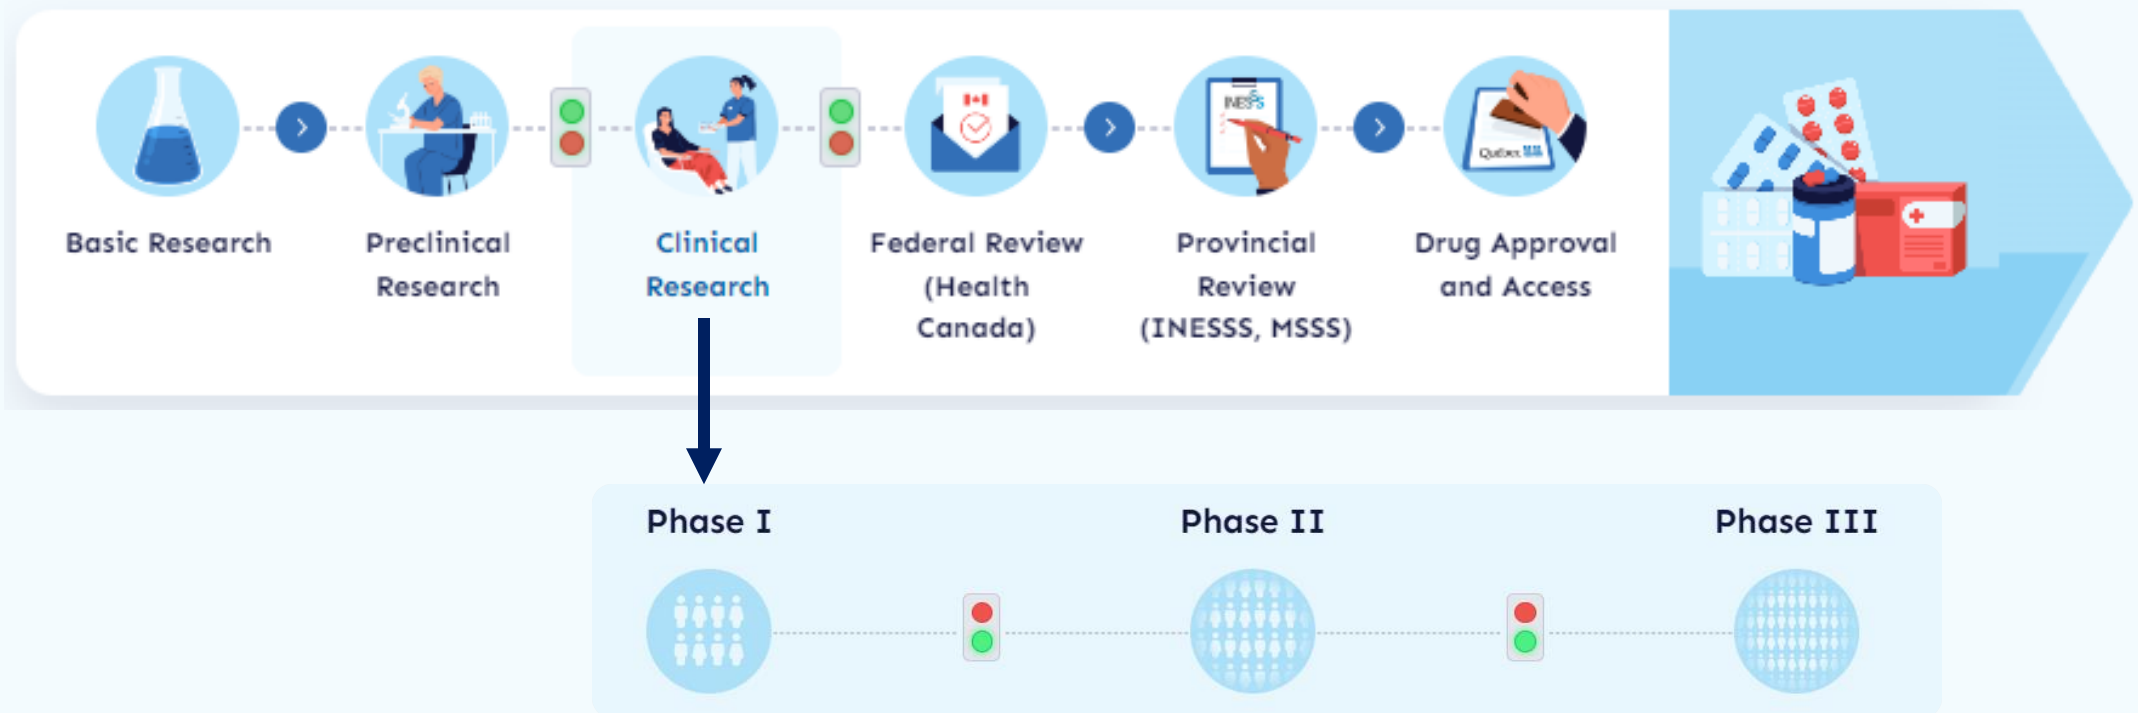

- Clinical research is based on previously obtained laboratory results (during the basic and preclinical stages of research).
- Through clinical trials, this research seeks to show that the possible new treatments are effective and safe for humans.

The Importance of Clinical Research

A key stage in the development of healthcare innovations

Clinical trials are part of clinical research. They are the final step in a long, multi-year medical research process that is highly regulated.

CATALIS Quebec in brief

- A **non-profit partnership** dedicated to the advancement and operational excellence of clinical research in Quebec.
- A **large-scale government mandate** to optimize Quebec's clinical research environment.
- Efforts are focused on providing more Quebec patients with **access to tomorrow's therapies**.

Accelerate clinical trial activation and optimize clinical trial conduct.

Facilitate patient recruitment and referral.

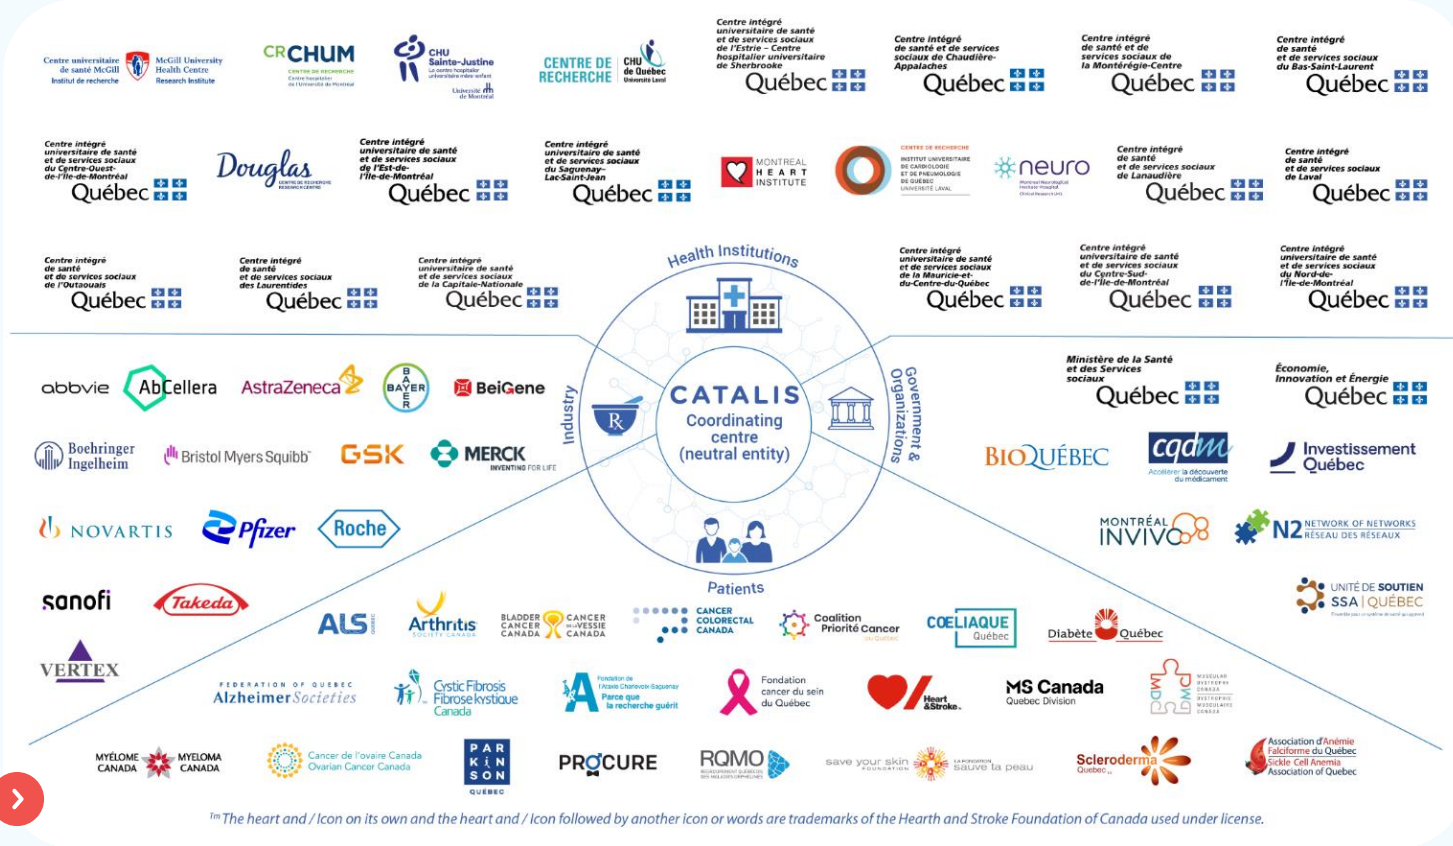

Increase Quebec's international visibility to attract more clinical trials.

Clinical Trials Quebec (CTQ)

Clinical Trials Quebec is an innovative information hub powered by CATALIS and developed in partnership with the Government of Quebec to:

- 1 Provide reliable information on clinical research.
- 2 Promote access to clinical trials for Quebecers.
- Accelerate the development of new treatments for the benefit of all.

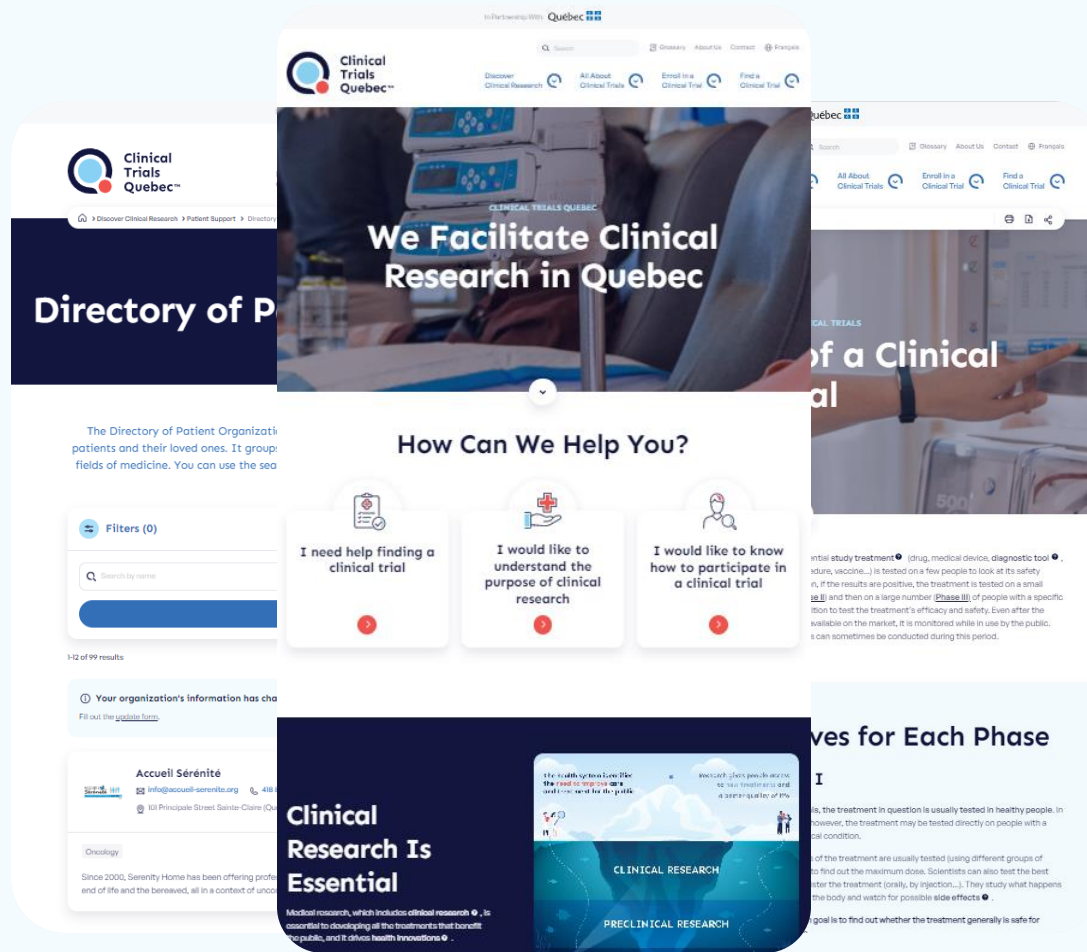

The CATALIS-CTQ Network

2

CTQ promotes patient engagement by facilitating access to clinical trials

Two ways to find a clinical trial:

- Accompanied, via the **Personalized Support Service** for Clinical Research
- On your own, via the **Quebec Public Clinical Trials Database**

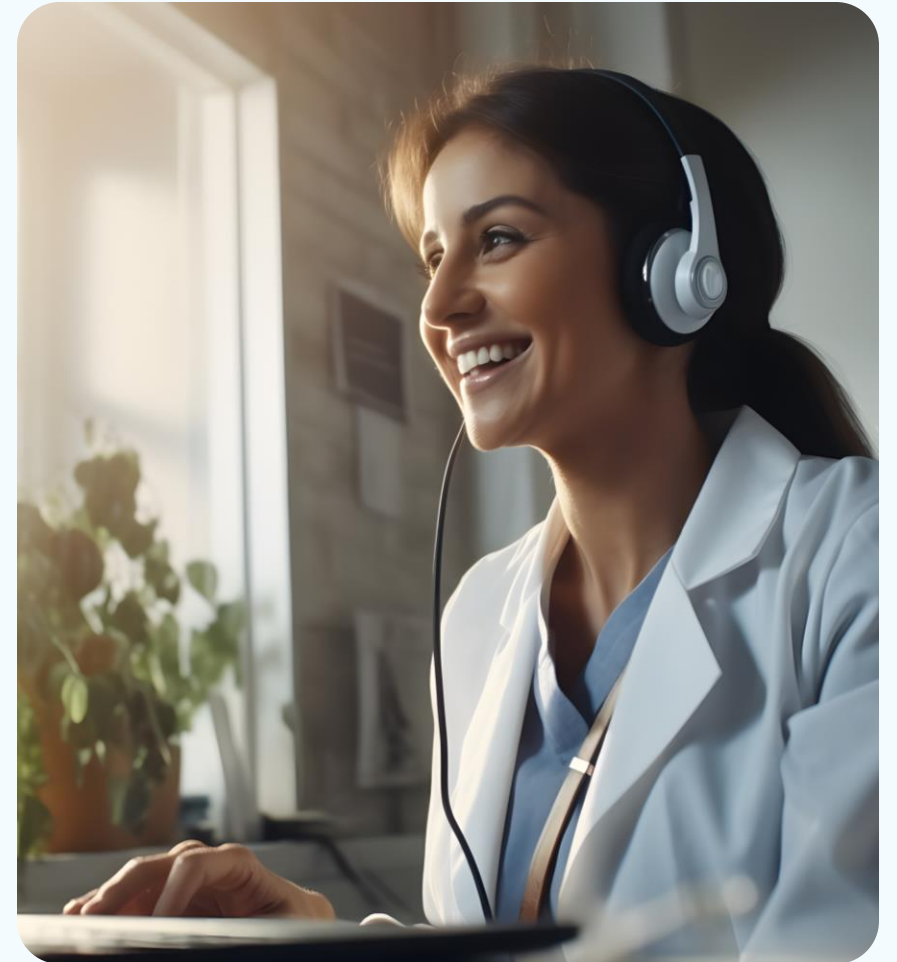

The Personalized Support Service for Clinical Research

- A free, bilingual service
- For patients, caregivers and medical staff
- To obtain a portrait of available clinical trials meeting the requested criteria

Call us at
1 866 669-6814 (toll-free)

Submit a request online

Quebec's Public Clinical Trials Database

- Autonomous search
- Free, bilingual access
- Unique model based on data from Quebec healthcare facilities
- Accurate, up-to-date local information
